According to the World Health Organization, India reported one of the highest rates of new polio infections in 2008, second only to Nigeria. Part of the CORE Group Polio Project, PCI is working in three high-prevalence districts in the northern state of Uttar Pradesh with a focus on building enhanced community awareness and mobilization resulting in increased participation in prevention and immunization interventions.

Through the BELONG project in Ethiopia, (Better Education and Life Opportunities for Vulnerable Children through Networking and Organizational Growth) PCI has helped create self-funded and self-managed microenterprise groups. Group participants meet each week to build camaraderie, discuss goals and challenges. With business development training skills provided by PCI, the groups begin to provide small loans to their members, usually with interest, for business and other economic or educational activities.

EARTH DAY

In the capital city of New Delhi, there are an estimated 100,000 orphans and vulnerable children working and living on the streets and in the city's train and bus stations, exposing them to many human rights issues such as physical and sexual abuse. In response, PCI provides interventions and services that include outreach, counseling, drop-in centers, vocational training, a mobile health clinic, a short stay home, access to formal education, and family tracing and reunification services.

MOTHER'S DAY

MEMORIAL DAY

In Zambia, the devastating effect of the AIDS pandemic has resulted in a generation of orphans, many of whom must raise younger siblings or fend for survival on the streets. Established in 2000 by PCI and Fountain of Hope, Africa KidSAFE (Shelter, Advocacy, Food, and Education) is Zambia's leading force addressing the street children crisis and providing orphans and vulnerable children (OVC) with shelter, food, medical care, counseling, education, and skills training.

Since 2002, PCI has been working with hundreds of communities in Bolivia to distribute school breakfasts to ensure pre- and primary school children have access to and stay in school. In partnership with the World Food Programme and the U.S. Department of Agriculture, PCI is reducing malnutrition rates, improving the overall health status of rural children, and increasing school enrollment and attendance rates.

Project Concern International's (PCI) work in Botswana is improving the quality of life for people infected with, or made vulnerable by HIV/AIDS. PCI programs are helping people by providing better access to quality health services and ensuring children who are orphaned or made vulnerable by HIV/AIDS have access to food and education.

Project Concern International (PCI) began operations in Malawi in 2007 to promote sustainable income opportunities among small-scale fish farmers in the southern Zomba River basin region. PCI is creating a sustainable foundation that helps people obtain the education, skills, and access to capital they need to decrease their vulnerability, strengthen their own livelihoods, and improve the health and well-being of their families and communities.

PCI is addressing the disparities in maternal and newborn health within urban slum communities in the southern city of Pune in Maharashtra. Program activities include providing access to quality prenatal and postpartum services for pregnant women and new mothers, improving access to a wide array of physiological, social, education, and economic empowerment services within slum communities.

COLUMBUS DAY

Waterborne disease and dehydration is one of the deadliest ‘silent killers’ on earth to which many children fall victim each year. Recurrent diarrhea, which often leads to child malnutrition, limits full child development and increases the risk of death. In Indonesia, PCI is empowering communities to adopt health and hygiene practices that ensure greater health for children through the innovative and powerful “emotion triggering” approach Community-Led Total Sanitation (CLTS).

VETERANS DAY

THANKSGIVING

Under the BELONG project, PCI has helped create self-funded and self-managed microenterprise groups, called self help groups. Additional economic strengthening activities, such as household poultry farming and urban gardening, also play a major role PCI's food security and livelihood programming for OVC and their caregivers.
